

Taghreed Al

Monshatih

Environmental & Social Consultant |

ESG Specialist | Stakeholder

Engagement Expert

INTRODUCTION:

Taghreed is a dedicated environmental professional with a strong foundation in both the environmental and social aspects of sustainability.

With academic qualifications in Chemical Engineering and Environmental Management Technology, she bridges the gap between engineering precision and socially conscious environmental strategies. Her work is distinguished by a commitment to sustainable development, stakeholder inclusivity, and impactful ESG (Environmental, Social, and Governance) practices.

Taghreed brings a well-rounded and interdisciplinary approach to environmental and social consulting, having led and contributed to a range of high-impact projects across multiple sectors. She specializes in stakeholder engagement, social investment programme management, environmental assessments, and community needs analysis. With experience spanning international research presentations, hands-on fieldwork, and strategic consulting, she is equipped to guide projects from conceptualization through implementation and evaluation.

Her career journey includes pivotal roles in environmental impact assessments, pollution control initiatives in Malaysia, and community-driven programmes in Oman. Taghreed has worked with various stakeholders—including governmental authorities, local communities, and private sector partners—to ensure that sustainability initiatives are both practical and inclusive.

Academic Background

- **2024** – Certification in Community Needs Assessment, Region 6 South Central Public Health Training Center, USA.
- **2022** – Master’s Degree in Environmental Management Technology, University of Malaya, Malaysia.
